

Storage and Handling Recommendations

Storage

Zahner Surfaces should be stored in its original packaging in a dry, indoor location away from direct sunlight. Do not store outside, in direct sunlight, or in wet environments.

Zahner Surfaces should be stored on flat, level ground. Do not stack objects on top of the Surfaces products or packaging. Keep in a low-traffic location to help protect all edges from incidental damage.

Any protective masking should be removed within 6 months of the date of shipment.

Handling

When handling Zahner Surfaces, the wearing of cotton, nitrile or latex gloves is recommended to prevent dirt and oils from contaminating the finish.

When carrying or manually transporting Zahner Surfaces, take all necessary precautions to prevent denting, scratching or other damage to the finish. If temporarily setting Zahner Surfaces on an edge, the use of wood blocking and/or shop towels is recommended between the sheet's edge and the ground in order to prevent denting or deforming of the edge.
