Zahner ImageWall®: ordinary budget, extraordinary impact

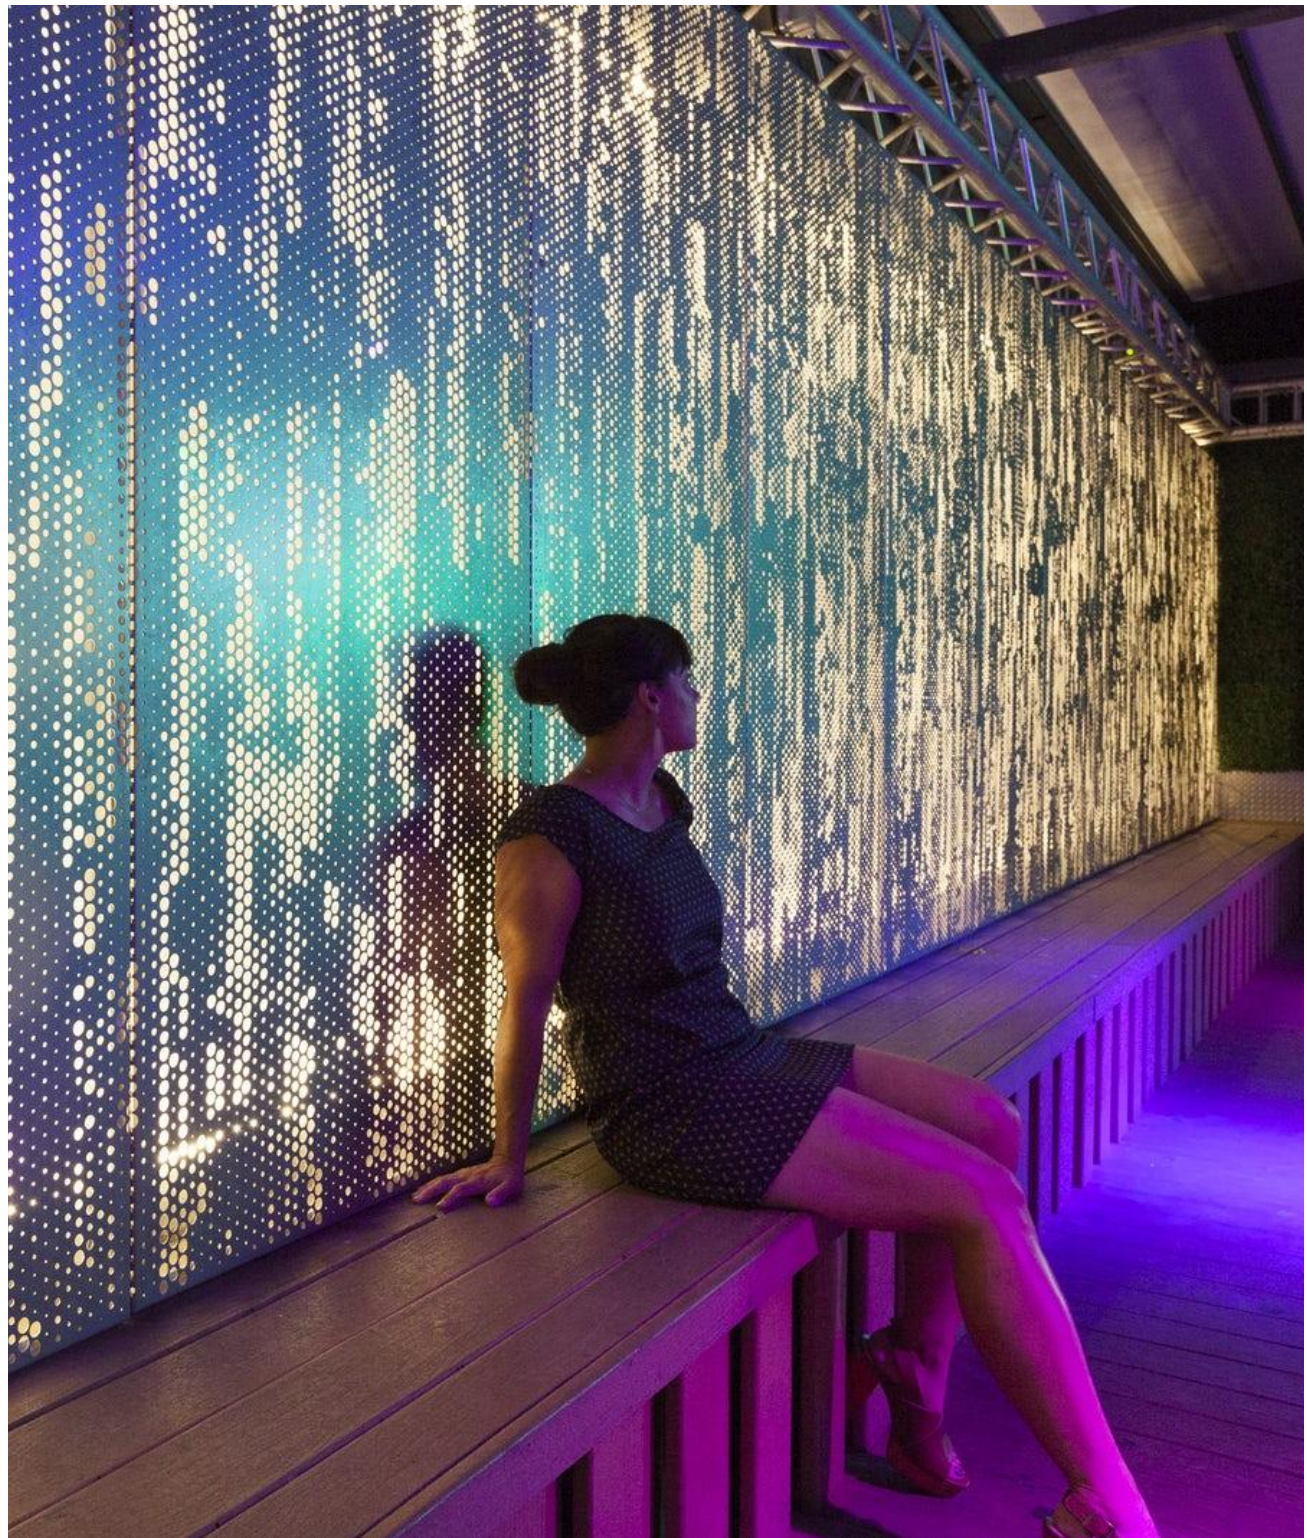

Zahner ImageWall lets you create innovative, custom-perforated metal panels with an easy-to-use product design and selection process that fits almost any budget.

The Zahner Method, a one-of-a-kind blend of architecture, engineering, metallurgy, and fabrication is still applied to your ImageWall project, just on a smaller scale.

Your design is engineered and built to your specifications. You choose from a variety of materials including zinc, steel, stainless steel, copper, or aluminum; and a range of unique patinas and surface treatments. Your ImageWall panels are shipped with all the hardware and substructure needed for easy installation.

Discover the utility, affordability and beauty of Zahner ImageWall custom-perforated metal panels.
