

Metal Finishes

Zahner architectural metal finishes reflect decades of metallurgical innovation. Our expertise in chemical compounds and climatic impacts has led to superior patinated finishes that outperform paint and other alternatives. Besides adding artistry, our processes provide a protective barrier for the underlying metals.

As stewards of the built environment, all Zahner material processes occur in our award-winning, EPA compliant facility. Zahner is dedicated to maintaining minimal impact on habitats and ensuring the health and safety of employees as well as the community at large.

Solanum™ Steel

Zahner's pre-oxidized weathering steel surface delivers rich, resonant red and umber tones through an accelerated natural weathering process.

Spectura™ Steel

A color-bending crystalline layer on steel adds a vibrant, shifting colors that vary as the angle of view or the angle of illumination changes.

Oscura™ Blackened Steel

Zahner's pre-oxidized weathering steel surface delivers rich, resonant red and umber tones through an accelerated natural weathering process.

Angel Hair® Stainless Steel

Zahner's Angel Hair is our patented process etching process producing a fine, non-directional grain for a smooth, uniform architectural surface.

Fuscara™ Blackened Stainless Steel

Fuscara Stainless Steel offers a sleek, modern look through deep charcoal tones and a durable, corrosion-resistant surface.

GB-60™ Stainless Steel

GB-60 is Zahner's non-directional mechanical finish that diffuses the natural reflectivity of metals by introducing very fine dimples, creating a satin glow.

Hunter™ Zinc

Hunter Zinc is a variegated, matte, zinc with organic panel-to-panel variation suitable for both contemporary and historic looks.

Dirty Penny™ Copper

Dirty Penny Copper features iridescent light and dark tones ranging from blues to greens and reds. The oxidized surface layer acts as a protecting barrier over time.

Baroque™ Zinc

Baroque Zinc matures beautifully, developing a rich umber tone over time, adding warmth and character while protecting the surface.

Star Blue™ Copper

Star Blue Copper is a premium surface with a stunning aged aesthetic, replicating centuries of natural copper weathering.

Roano™ Zinc

Designed to age gracefully like vintage wine or tanned leather, Roano Zinc offers a stable surface that improves over time, darkening into a rich umber tone.
